# PAUL SCHMELING

*Paul Schmeling est un pianiste, improvisateur arrangeur et pédagogue américain.*

*Étudiant à Berklee School Of Music (Boston, Massachusetts, USA) à partir de 1959 il deviendra à son tour professeur à partir de 1961. Il sera ensuite président du département de piano (chairman) de cette prestigieuse école pendant de nombreuses années.*

*Paul Schmeling était considéré comme un maître de l'harmonie, très influencé par le jeu du pianiste Bill Evans. Son aptitude à jouer tous les standards dans n'importe quelle tonalité en avait fait l'un des pianistes les plus prisés des vocalistes. Il a ainsi pu accompagner de grands artistes de jazz comme Clark Terry, George Coleman, Frank Foster, Art Farmer, Slide Hampton... Il s'est également produit dans le groupe de Herb Pomeroy aux côtés du trombone Phil Wilson pendant de nombreuses années. Contrairement à beaucoup de gens de sa génération qui n'ont pas adopté la technologie, Schmeling s'épanouit à une époque où le PC est roi.*

*Paul Schmeling est l'auteur de plusieurs ouvrages pédagogiques (théorie, claviers...).*

*"Berklee Practice Method - Keyboard", l'un des quatre cours qu'il enseigne sur [Berkleemusic.com](http://Berkleemusic.com), est très populaire. Ce cours a été nommé meilleur cours universitaire en ligne d'Amérique en 2006 par l'Association de formation continue des universités.*

## MÉTHODOLOGIE

*Ces exercices écrits dans un ambitus adapté au chant. Contrairement à des schémas mélodiques courants telles que des arpèges, gammes, modes ou intervalles, ces lignes mélodiques n'ont pas vocation à être transposées systématiquement.*

*Certaines lignes mélodiques s'apparentent à des schémas ou "patterns" indiquant des accords, gammes ou modes. Dans ce cas, il peut être utile d'indiquer les symboles d'accords ou noms des modes ainsi repérés. Comprendre la logique et le sens d'une phrase musicale permet souvent de mieux entendre intérieurement la musique et donc de mieux chanter.*

*Certaines exemples s'apparentent à des séries mélodiques (phrases de huit à dix notes jouées sans répétitions). On pourrait penser que Schmeling s'est inspiré de la musique sérielle. Ce procédé typiquement "atonal" est un excellent exercice pour développer aussi bien son oreille intervallique ou "relative" (le lien entre chaque notes) que l'oreille absolue (la "couleur", la spécificité et la mémorisation des hauteurs des notes).*

*Il est conseillé de chanter ces exercices avec le nom des notes et à un tempo régulier en respectant le rythme indiqué.*
